DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of claims 1-15 in the reply filed on 11/5/04 is acknowledged.
2. Claims 16-18 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 11/5/04.
3. Claims 16-18 have been canceled, claims 19-21 have been added by the Application in the reply filed on 11/5/04.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
5. Claims 4-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
6. Claim 4 recites the limitation "wherein programming of eFuse bits" in lines 1-2. There is insufficient antecedent basis for this limitation in the claim.
7. Claims 5-7 are therefore rejected because of their dependency on claim 4.

Allowable Subject Matter

8. Claims 4-7 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

9. Claims 1-3, 8, 20 and 9-15, 21 are allowed.

10. The following is an examiner's statement of reasons for allowance:

The prior art of record fail to disclose a method of operating an integrated circuit including read accessible memory comprising the steps of testing memory read operations beginning at a maximum speed at successively slower speeds until all memory reads pass; determining memory read program bits for a highest memory speed passing the memory read tests; and programming write once bits according to determined memory read program bits as recited in claims 1-3, 8, 20.

The prior art of record also fail to disclose a method of operating an integrated circuit including write accessible memory comprising the steps of testing memory write operations beginning at a maximum speed at successively slower speeds until all memory writes pass; determining memory write program bits for highest memory speed passing the memory write tests; and programming write once bits according determined memory write program bits as recited in claims 9-15, 21.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
